

Opinion

Ideology Within Our Gates

When one looks at the past issues of "The Globe," it is evident from the "Letters to the Editor" that we have an overabundance of opinions that will never vary regardless of the evidence that might be forthcoming from an alternative view.

As an example; Several weeks ago a resident raised some questions on the monies that were presented in our corporate auditor's report generated by KPMG. As a resident, why shouldn't one have the right to question the source and content of these audited figures. There were no accusations by the resident and yet another one of our residents, Mr. D. Blodgett, responded by castigating the letter writer and anyone else within shouting range.

Right or wrong, when we review financial numbers in our corporate documents, there are few people who fully understand the context of the finance process that is utilized by PCM. If you find an error in any communication, it might be better that you point out the error. That would hold true if you are reviewing resident's comments, OR, PCM documents.

Over the past years, I have noticed that you have never brought to light any errors that are a responsibility of PCM. Your ideology that "PCM Can Do No Wrong" is as biased

as is that of many others who live here who believe that, "PCM Is Capable of Making Errors" (intentional or unintentional).

Your opening statement in your letter to the resident who submitted his "Letter to the Editor" in the Globe is as follows," I enclose \$2.00 to cover the cost of mailing me a document I, and every other Third Mutual owner has in their possession. Mine is on nine pages, because it is duplex printed. The copy you sent me is eighteen pages long, because it is not printed on two sides."

You stated that, "At 90, I cannot afford to get exercised by such trivial issues, ..."
Most people will concur with you but then question why you would even make a problem out of the format of the document that was sent to you.

Not every printer has the capability of printing in Duplex Mode, BUT, if this is that critical, I would ask, "Have you contacted PCM to save thousands of our dollars in paper documents by printing all of their material in DUPLEX Mode?"
