

Reference: Third Mutual Board of Directors Meeting - Tuesday, April 17, 2012

Today I received an interesting e-mail stating....

"Watching the meeting..... **Who is the Dictator?"**

Noting that there were only about 12 members in attendance, we were encouraged by President Straziuso to come to future meetings. And yet, when we do attend and questions are asked that "hit a nerve," we are often faced with silence. It is not required that we receive an answer, so is it the hope that we will just give up and not return? When we approach the podium and are told there is no more time for questioning or we are out of order, do we just give up? Is that the desired result?

Things are happening on the United, Third and GRF Boards and we all need and must be aware of what is occurring. We have entrusted these people with our money, our homes and our future. Are they counting on our lack of knowledge and our disinterest? Are we going to continue to allow them to dispense partial information when complete and thorough facts are needed to understand the full picture? Are we just going to sit back and allow them to carry on as usual and continue to determine our future until we can no longer afford to live here? Do we allow the discord that exists on the Boards and make it possible for them to attempt to replace qualified and experienced Directors on various committees? Are they counting on our disinterest or are we just too tired to really care anymore?

I think we are better than that. I **KNOW** we are better than that! Attend an actual board meeting. Sit in a chair and listen and learn. Speaking at the podium is not necessary. We will show our Directors that we are interested and will hold them accountable for their decisions. We will let them know we are paying attention. We can't leave this to our neighbors or a handful of others. We need to become responsible for our own future. There is power in numbers, so we need to stand together. **WE deserve** this respect! We are the generations that fought in W.W.II, Korea and Viet Nam. We fought and died for the truth then. **WE NEED TO DEMAND THE TRUTH NOW!**
