OUT OF THE FRYING PAN.....

The bankruptcy filing for Connexion, the company servicing our Broadband and also providing telephone service to a large number of villagers, shoved all other issues right off the table. Unfortunately additional concerns were generated by the ill-informed who circulated e-mails including West Coast Internet in the debacle. Yes, Connexion went belly-up, but West Coast is NOT part of the bankruptcy and is alive and well and still providing internet service. The primary concern is for subscribers to Connexion's phone system, which, for some is their sole lifeline. As long as the phone service is working, there is no problem, but should there be an interruption, who will come out to fix it?

Hindsight is always 20/20 and as expected many are now questioning "how could this happen"? How could we have allowed our community to be taken in by the likes of Mr. Glen Lang, top dog in Connexion. There's a google trail regarding his business history: alleged fraud against Direct TV mentioned in a worker lawsuit; and for a more detailed follow up on his previous encounter with the SEC check

out <http://www.sec.gov/litigation/admin/33-7916.htm> Not a very good guy! Who among us can forget the smugness of Erwin Stuller, president of GRF when he announced their year-long well-kept secret coup.... the snaring of Connexion to run Broadband? Lucky us! Maybe this will serve as a lesson to our Boards to quit buying a pig in a poke...look before you leap and remember the buck stops with you... so first vet, vet, and vet again before patting yourselves on the back!

While most of the focus is on the Connexion bankruptcy and how it will affect us and to what degree financially, GRF advises they have special legal counsel dealing with these concerns.
